Java Loops I

by AvmnuSng

Problem Submissions Leaderboard Discussions Editorial

Objective

In this challenge, we're going to use loops to help us do some simple math.

Task

Given an integer, N, print its first 10 multiples. Each multiple $N \times i$ (where $1 \le i \le 10$) should be printed on a new line in the form: $N \times i = result$.

Input Format

A single integer, N.

Constraints

• $2 \le N \le 20$

Output Format

Print ${\bf 10}$ lines of output; each line ${\bf i}$ (where ${\bf 1} \le {\bf i} \le {\bf 10}$) contains the ${\it result}$ of ${\bf N} \times {\bf i}$ in the form: N \times i = result.

Sample Input

2

Sample Output

2 x 1 = 2 2 x 2 = 4 2 x 3 = 6 2 x 4 = 8 2 x 5 = 10 2 x 6 = 12 2 x 7 = 14 2 x 8 = 16 2 x 9 = 18

2 x 10 = 20
